DETAILED ACTION

Election/Restrictions

1. Claims 61-64 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected groups II, III, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on October 27, 2005.

Drawings

2. The drawings were received on October 18, 2004. These drawings are approved by the examiner of record.

Claim Objections

1. Claims 4-60 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims 4, 5, 11, 13, 14, 16-18, 20, 21, 23, 24, 26-32, 34-36, 38, 39, 43, 45, 46, 51, 52, 55, 57-60. See MPEP § 608.01(n). Accordingly, the claims 4-60 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

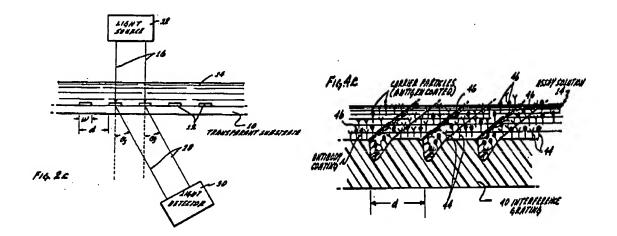

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2877

3. Claims are rejected under 35 U.S.C. 102(b) as being anticipated by Nicoli et al.

Claim 1

Nicoli et al. discloses an array-support surface (Fig. 2c, Ref. 10) and under the support surface, in spaced apart relationship thereto, a field of embedded optical features (Fig. 2c, Ref. 12) exposed to be illuminated by a broad light beam (Fig. 2c, Ref. 32) of excitation radiation addressed to the support from a predetermined general direction selected to produce a surface wave effect at said support surface, the field of embedded optical features (Fig. 2c, Ref; 12) and the support (Fig. 2c, Ref. 10) being so constructed that light of the beam incident on the features is launched through the support at an angle to said support surface that produces said surface wave effect of radiation in the manner that it can produce fluorescence from the labeled samples to be imaged beyond said support from a direction different from the direction of said illumination (Col. 16, lines 33-56).

Application/Control Number: 10/618,838 Page 4

Art Unit: 2877

Claim 2

Nicoli et al. further discloses the support surface is planar (See Fig. 2c).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nicoli et al..

Claim 3

Nicoli et al. discloses the claimed invention except for the support is in the form of a microscope slide with 75 mm length, 25 mm width and a 1 mm thickness. It would have been obvious to one having ordinary skill in the art at the time the invention was made to Nicoli et al. with microscope slide since it was well known in the art that using a microscope slide makes the support compatible with other types of microscopes, therefore making it universal which allows users of different types of microscopes to use the support.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Stafira whose telephone number is 571-272-2430. The examiner can normally be reached on 4/10 Schedule Mon.-Thurs..

Application/Control Number: 10/618,838 Page 5

Art Unit: 2877

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Toatley can be reached on 571-272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
